

## **Ride Safe & Clean 2008** **Enervit® with the Comari**

The success at last year's Maratona dles Dolomites has spurred the on-line group called "Le Comari della MdD", to look for and create new ideas to carry on in the field of clean roads and charity.

As illustrated in previous press releases, the funds that are raised thanks to the sale of the "lo Corro Pulito - Ride Safe&Clean" bracelets and bandanas, will be given to the Neonatology and Infant Intensive Care Ward of the "Burlo Garofolo" Hospital in Trieste.

After seeing the splendid naturalness of this no-profit effort, support for the initiative this year is also coming from another source.

On 29th June in Corvara, after the finishing line, at the joint Comari-Enervit® Gazebo, in front of the Boé cable car, the participants will be able to give their "rubbish" (aluminium foil, paper, empty packets of maltodextrin) and receive in exchange a supply of Enervit® energy bars.

Lastly, on Monday, there will be the so-called "Pattume Day", i.e. the collection of the refuse left at the roadside during the race, hoping this year, with everyone's collaboration, to reduce the collection to a minimum.
